

ENVIRONMENTAL WASTE CONTAINERS

COSMO® Environmental Waste Containers are a sustainable option for the waste and recycling industries. Lightweight, durable, and low-maintenance, COSMO containers deliver superior functionality and aesthetics compared to traditional steel and aluminum dumpsters. Flexible business solutions, including leasing, maintenance and service agreements, and on-container advertising, enable a variety of customers to differentiate themselves from their competition.

CONSTRUCTION

- One-piece molded construction improves durability and strength performance
- No refurbishing required
- Double-walled components improve overall performance and handling
- Standard seal-tight lids for leak-proof performance
- Easy to clean—resistant to UV rays, chemicals, saltwater, and petroleum-based liquids
- Improved safety characteristics with no sharp edges
- Quiet pickup and disposal, allowing neighborhood-friendly drop-offs and collection in noise-sensitive areas

AESTHETICS

- Will not rust and molded-in colors will not fade—retaining new appearance
- Customizable exterior offers permanent color schemes, and in-mold labels for placement of product branding and company logos
- Improved public perception of waste containers over time

PORTABLE

- Improved weight reduction—one-third less weight compared to steel containers
- Stackable for improved shipping

SUSTAINABLE

- Each unit includes a five-year warranty
- Made with 100% recyclable, FDA-approved polyethylene plastic
- Environmentally friendly when compared to steel containers

SERVICES

- Life-cycle cost analysis
- Leasing programs
- Service and cleaning program

MARKET-SPECIFIC BENEFITS

High-Visibility Applications

Provides branding opportunities by offering on-container advertising in highly visible locations, including sports venues, stadiums, restaurants, apartment and condominium complexes, and corporate offices.

Municipalities

Provides a quiet, longlife waste container that maintains a new appearance throughout its lifetime. Durable polymer construction lowers maintenance costs due to its resistance to corrosion and graffiti.

Organic Waste/Recycling

Offers restaurants, food processing plants, and residential areas the capability to separate waste streams in a safe and durable container that is resistant to corrosive substances.

Waste Haulers

Provides a quiet, lightweight container that is less hard on equipment than steel and aluminum containers. Its non-corrosive construction eliminates leakage, preventing groundwater contamination while lowering maintenance costs by preventing frequent repair.

Consumer/Big Box Stores

Allows consumer-oriented businesses to provide customers with a lightweight and durable waste receptacle suitable for use during home remodeling and construction projects.
